

ENSURE THE PERFECT POUR

PERLICK CENTURY SYSTEMS NOW PROTECTED BY DRAUGHT GUARD'S DRAUGHT LINE TREATMENT TECHNOLOGY

Draught Guard's proprietary and third-party validated technology propagates an omnipresent, low-frequency treatment signal throughout the entire draught beer line, no matter the length of line. This oscillating treatment signal works around the clock to manage bacteria levels, inhibit the growth of biofilm, and prevent the formation beer stone.

Each Perlick Century System is factory engineered to **MAXIMIZE PROFITS** for the bar owner, brewery, restaurant chain or large venue by delivering:

- A beverage to the customer that best represents the producer's intended quality and style, **driving repeat sales**
- Consistent pours at the correct temperature and with the proper amount of foam, **maxmizing keg yield**

By partnering with Draught Guard, the enhanced Perlick Century System will **DRIVE ADDITIONAL PROFIT** by:

- Creating the opportunity to extend line cleanings from 2 to 12 weeks, significantly **reducing waste**
- Maintaining the highest draught line quality between cleanings, **improving customer experience**

Please contact your local Perlick sales representative for details.
